

CREATE A QUIZ

Using information from the video lesson,
create a quiz that other students can take.

HOW TO GET STARTED

Take notes during the video lesson.

You want to ask questions about important information shared and
not tiny details that may be forgotten after the video is over.

Fun facts or unusual bits of information are great for bonus questions.

Use the information you gather to create your questions and to create your answer key.

Create a quiz that has 10-15 questions with one right answer for each question.

TYPES OF QUESTIONS YOU CAN USE

Select one or more of the following types of questions:

Multiple Choice (no more than 4 answer choices)

True or False

Fill in the Blank

Short Answer

Matching (no more than five things to match)

MAKE A KEY

Identify the correct answers for each question.

For short answer responses, provide key words that should be in the response.

DOUBLE CHECK YOUR WORK

Are your questions clear?

Are your questions challenging without being impossible to answer correctly?

Is there only one right answer for each question?

Is your answer key complete?
